**Herbert Matare : Bioethics: The Ethics of Evolution and Genetic Interference** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Bioethics: The Ethics of Evolution and Genetic Interference:

Arguing that human evolution has come to a stand-still, this book sets out to explore the evolutionary steps that have defined life on this planet. It describes the stages from cosmic to chemical and biological evolution and to the development of civilization and culture. From this scientific approach, the author concludes that new rules of ethics are required in order to maintain and improve the civilization and culture of humanity. Matareacute; argues for corrective genetic interference and explores the moral implications.

About the AuthorH.F. MATAREacute; is President of International Solid State Electronics Consultants and Director of Compound Crystals, Inc. He has worked in and directed a number of research laboratories in France, Germany, and the United States. Matareacute; has published extensively in science journals, and has lectured in universities in Germany and the United States. He is listed in Who's Who in Science, American Men of Science, Who's Who in the West, Leaders in American Science, Who's Who in California, A Century of Honors, IEEE, Dictionary of International Biography, and others. He is patentee of more than sixty patents, among them the first European transistor patent in 1948.
