He is able to share valuable nuggets which one can literally use without thinking too far. That I truly appreciate and it makes me believe in the principle of 90 minutes.What I didn't like, I felt the other stories of other people like the aerospace were just more of additions to

fatten the book unnecessarily, however it's not bad, perhaps I just didn't connect with the story. I gave the book a high rating based on its practicality. Thanks to the author and I wish he writes more books. Kind regards

The only promise the author kept is that you can actually read through the book in 90 minutes (simply because the letters are so unusually large). I'm halfway through the book and have learned nothing new here. It's a shameful attempt to make money with a book and its catchy title without much of a time investment on the side of the author to actually provide quality content. I'd give it half a star if I could.
