`The book is a useful introductory reader for any initial post-compulsory teacher training programme, or the early stages of a degree in post-compulsory education and training. It would also be valuable additional reading for basic skills tutors embarking on the new adult literacy and numeracy qualifications' - Escalate`It is a useful and practical resource which, even if not used for the purposes of staff development, contains helpful insights into something we

often talk about but rarely stop to examine' - Adult Learners Self-esteem is a major factor in learning outcomes, with research consistently showing a positive relationship between how a person values themselves and their level of academic attainment. This book shows tutors how to build self-esteem in adult learners, especially those engaged on courses to improve literacy skills. The author presents a structured programme designed to raise self-esteem and also presents a theoretical basis for the development of self-esteem. Practical activities and strategies are presented for building self-esteem in both tutor and student. The book is organized in two parts. Part I provides tutors with an understanding of a student's psychological needs and also provides guidance on developing the necessary teaching skills conducive to the building of self-esteem.
