Book is offering wome very simple truths for a person, who wants to be more successfulland more productive. First thing is clarity - you have to be clear of the things - whether those are goals or problems in life.Basic principle stays the same: clearly identify situation. Write down. As Brian says, only 3 percent of the people are writing downtheir goals - and those are the richest people in the world. Very important thing is also to have a life's goals - a mission. Some global goal to accomplish. If there is one (or more), then it is much easier to follow everyday's goals. Simply just ask question:'Is the task that I am working on right now in order with my mission or my life's goals?' Do something every day that moves you closer to yourgoals. And always focus at one thing at a time - golden rule of productivity.Aristotle said, 'We are what we repeatedly do.'Developing new

habits is hard only at beginning. Once they became habits, it's easier. All in all very good book. Short and clear. I've also read 'Eat that frog' from the same author. If you want longer explanations of some concepts in this book (for example Vilfredo Pareto's 80/20 principle), go ahead and get it. For me, one of the best books of working focused, concentrated and improving productivity is definitely Staffan Noteberg's Pomodoro Technique Illustrated. Bull's eye - warmly recommended. 0 of 0 people found the following review helpful. I like Brian Tracy. By Tinkerbell. I like Brian Tracy. Have read his other work, I was really looking for a book that dealt with mindfulness more. The section on mindfulness is good. So is the book. Just not what I was looking for. Read it all anyway. 0 of 0 people found the following review helpful. Excellent book. By Adolfo. It will help you target your goals and motivate you to persist until you do it. It has some tasks that are really helping me.

Your aim in life should be to achieve all of the wonderful things that are possible for you. There is no reason for you not to be earning twice as much as you are today, or even five or ten times as much. Your potential is practically limitless, if you could just learn how to utilize it. Clarity, Focus, and Concentration: Three strong, simple attributes needed to hone in your potential and hit the bull's eye! And just as you can develop your physical muscles through hard work and concentration, you can develop your mental muscles through continuous repetition. You have the ability right now to achieve more than you ever have before. Bull's Eye will teach you how to unleash your powers for success and accomplish more in the next few months than many people do in a lifetime.
