Business By The Book is a great reminder on how God wants us to treat other people and that we have to be honest in all situations even if it causes your business a loss. Any losses you suffer by being honest, God will make up for you in other ways. I would recommend Business By The Book for its practical advice and how to achieve God's purpose for your business. 0 of 0 people found the following review helpful. Good Guide to Business Savvy By Kenneth M. Fowler I already have the book, and was impressed with the down to earth guidance. Burkett always references the Word of God accurately. I bought the tapes because I can listen to them while driving, making my car a "university on wheels." Listening to Larry's admonitions is different from reading it. Processing it from 2 different view points is so helpful. I definitely give it a thumb's up for someone wanting to build a business that will last for the long haul. Just like gravity works whether we want it to or not, the principles set up by our Creator (like gravity) also work when they are followed. Burkett guides the listener through every facet of a business and its operations. It's up to each of us to make the choices that will propel us forward successfully, and the author lays those choices visible in a straight forward, down to earth manner. The rest is up to us to follow through. 0 of 0 people found the following review helpful. It's like being hit over the head with a brick. By Jerry Kubitsky I used this book as a teaching tool for my Business Ministry Class. Each week we would go through a chapter and discuss how it applies to our everyday business decisions. I found myself constantly be challenged by what I thought was right vs what God wants us to do. I did not agree with everything the author stated, but darn near most of it. As one of our members said, "Before we went over the lesson I would have made decisions I would have regretted. Now the decisions I make reflect closer to what God wants." I highly recommend not only reading the book, but writing down your thoughts about each chapter and how you either need to make changes or keep on the path your on.
