Lavine I read Herman Mashaba's latest book "Capitalist Crusader" with deep dismay at the way South Africa has been sidetracked down a desperate road that has all but destroyed the economy. His research is impeccable, his conclusions persuasive and anyone with a care about the future for their families will find it, at the same time, offering a positive way forward. It's not a crusader's rant. It is a brave presentation of the facts and consequences of an utterly

unsustainable socialist agenda that has led to South Africa now suffering one of the highest unemployment rates (+25%) in the world.. mainly among the young. When I had to give up my university studies 35 years ago I was so angry that I wanted to leave South Africa, get military training and an AK47 and come back to kill evil white people hellip; I'm just as angry now as I feel my economic freedom is under threat, but I'm staying to fight for what I believe in. When Nelson Mandela became South Africa's president in 1994, Herman Mashaba thought his struggle for personal and economic freedom was over, the battle won. Twenty-one years later, he has had to question that assumption as his freedoms are eroded and economic controls tighten. Mashaba, a selfmade entrepreneur who started his business Black Like Me in the dark days of apartheid, is committed to freeing South Africans from poverty. As a successful business person, Mashaba says he can no longer be silent on the state of the South African economy. In Capitalist Crusader he outlines his quest for economic freedom for all South Africans through a firm commitment to capitalist principles. He describes the changes in his political affiliations and maps out the route South Africa needs to follow to escape entrenched unemployment, poverty and inequality.
