D. Gabor : Central Banking and Financialization: A Romanian Account of how Eastern Europe became Subprime (Studies in Economic Transition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Central Banking and Financialization: A Romanian Account of how Eastern Europe became

Subprime (Studies in Economic Transition):

1 of 1 people found the following review helpful. The most compelling account of macroeconomic policy and crisis dynamics in Eastern Europe
By Cornel Ban John
If you need a serious book on central banking and the political economy of monetary policy in Eastern Europe, Daniela Gabor's book should be the first on your list. Based in a sophisticated analytical framework anchored in post-Keynesian economics, the book shows how the hubristic financialization of Eastern Europe landed much of this region into an economic cul de sac. Central bankers, the IMF and private investors play hard in this historical drama that makes the object of Gabor's exquisite analysis.
Cornel Ban (Brown University)

This book explores the causes and effects of the rise of neoliberalism in Eastern Europe in the aftermath of the collapse of the Soviet Union. It provides a political economy analysis of the role of central banks, and identifies them as a key actor in the production and dissemination of the neoliberal economic policies.

"Some people claim that Strauss-Kahn was a 'reformer' who changed the IMF after he took over in 2009. Certainly, there was a shift in rhetoric but detailed study by Dr Daniela Gabor ... has shown that the substance is business-as-usual." - The Independent
