Jeffrey M. Davis, Annalisa Fedelino, Rolando Ossowski : Fiscal Policy Formulation and Implementation in Oil-Producing Countries before purchasing it in order to gage whether or not it would be worth my time, and all praised Fiscal Policy Formulation and Implementation in Oil-Producing Countries:

Countries with large oil resources can benefit substantially from them. However, despite their huge natural resources, many oil producers have had disappointing growth, widespread poverty, and continuing vulnerability to oil price and other external shocks. Fiscal policy can play a central role in determining the extent to which a country benefits from its oil wealth. This book brings together studies that provide analysis and findings on fiscal policy issues in oil-producing countries from a diverse international perspective. A key focus for the authors is how to manage oil

resources in a way that contributes to a stable macroeconomic environment, sustainable growth, and poverty reduction.
