Optimization With Excel Solver, I can definitely say that if you make money with information products, this book is a MUST READ. I sell eManuals from my web site and I was astonished at how wide and complete the author Stephanie Chandler's suggestions were. As I was reading this outstanding book, whenever I came across a new, valuable suggestion that I could implement right away, I wrote the suggestion on any available free space inside the front or back covers. By the time I had finished reading the book, I had more than 70 action items that I could do immediately to increase sales of my eManual, the Excel Statistical Master. To sum up how helpful and valuable I feel that this book is to infopreneurs, this book will be worth 1000's of times what I paid for it after I have implemented the suggestions that came from it. This book was so good that I'm buyin' anything Stephanie Chandler puts out. This is a Must-Read For Making Money With Information Products !12 of 12 people found the following review helpful. Complete Guide - Excellent resourceBy John ChancellorFrom Entrepreneur to Infopreneur is a wonderful resource for anyone who sees the value in creating a passive income source from their current area of expertise - either hobby or profession. If you don't understand or see the value in becoming an Infopreneur, then this book is definitely for you.The book is well written, organized and full of valuable information. It offers an easy to understand, step-by-step guide for the entrepreneur to transform their business and become an information marketer.It is very easy for the entrepreneur to under estimate the market potential for their knowledge. Stephanie does an excellent job of illustrating how to take the knowledge we have acquired and to package it into a valuable product that can generate income on a passive basis. The internet has made it possible - actually easy - for anyone to package and sell their knowledge worldwide.While it is often referred to as passive income, Stephanie is quick to point out that creating an informational product is simply the first step. If you are not willing to actively market your product/idea then you will have wasted a lot of time and energy in creating it. The income might be passive but there is this huge need for very active marketing. But do not despair. All the steps and instructions for effective marketing are in the book.The book is full of hints, helpful tips and resources. I had read less than 30 pages when I was given a suggestion that made me put the book down and implement it. There are literally hundreds of helpful website addresses in the book. In addition there are profiles of successful infopreneurs, explaining what they do and how they did it.One other extremely valuable lesson that is hammered home throughout the book is the value of becoming a recognized expert in your field. There is nothing like publishing book(s), articles, special reports, etc, that will establish your credibility as an expert. This can dramatically increase your value and thus income from other sources.The book has way too much information to absorb in just one reading. If you are serious about becoming an informational marketer, read it a couple of times and then use it as a handy reference. A great resource for those just starting out or the seasoned infopreneur.76 of 78 people found the following review helpful. Focuses on Traditional PublishingBy CustomerWhen I bought this book on I was hoping to get some tips and resources for the burgeoning world of online content -- eBooks, reports, newsletters, etc. In that regard, this book was a disappointment. 90% of the content relates to authors who are publishing for print. If you are getting a book traditionally published or self-published, you may benefit. If your focus is online content, I would keep looking.I feel like the title misrepresents the content. "Getting your book published" or "publishing and marketing your book" are more apt. If I didn't feel a little duped by the promise of content, I would probably up my rating to 3 stars. Only chapter 6 and maybe part of chapter 7 (less than 20 pages) focus on anything other than the traditional publishing model.

Infopreneurs sell valuable information online in the form of books, e-books, special reports, audio and video products, seminars, and other media. This definitive guide will show how to master the tools and tactics of the most successful infopreneurs, so you can succeed at producing, marketing, selling, and automating delivery of information products online. This guide comes complete with interviews of successful infopreneurs.

From the Back CoverBecome an infopreneur—and be your own boss! From Entrepreneur to Infopreneur shows you how to make the jump to infopreneur so that you can cash in on the exploding new online information market. This one-of-a-kind guide to infopreneurship provides the tips and tactics you need to succeed and walks you through the steps to start earning money almost immediately, including: Becoming an expert in your chosen field Developing valuable information products at little cost to you Building your e-commerce Web site Marketing your information products to customers Building a healthy, consistent cash flow Each chapter concludes with a profile of a successful infopreneur, including Joe Vitale, Dan Poynter, Dottie Walters, Tom Antion, and more. "Chandler knows how to take action and make ideas a reality! The practical steps and outstanding resources she shares will enhance anyone's business and their lives. Whether you are investigating the possibilities or are ready to create new income generating opportunities, From Entrepreneur to Infopreneur provides a practical road map to creating products that will enable you to succeed with ease." —Romanus Wolter, "The Kick Start Guy," www.KickStartGuy.com, author of Kick Start Your Success "Chandler covers all the bases. She asks all the right questions then supplies all the right answers in her astonishingly comprehensive and very timely book. It's loaded with valuable life-changing information—and it's fun to read, too." —Jay Conrad Levinson, the "Father of Guerrilla Marketing" bestselling author of the Guerrilla Marketing series of books, www.gmarketing.com "From Entrepreneur to Infopreneur inspires and educates

us, in an attention-grabbing, all-inclusive format, to take our information and prosper from it not only personally, but also professionally and financially as 'infopreneurs.'" —Stacy Henderson, Editor in Chief of Home Business Magazine
