**From Academic Press : Handbook of Safeguarding Global Financial Stability: Political, Social, Cultural, and Economic Theories and Models** before purchasing it in order to gage whether or not it would be worth my time, and all praised Handbook of Safeguarding Global Financial Stability: Political, Social, Cultural, and Economic Theories and Models:

Political and social forces exert pressure on our globalized economy in many forms, from formal and informal policies tonbsp;financial theories and technical models. Our efforts tonbsp;shape and direct these forces to preserve financial stability reveal much about the ways we perceive the financial economy.nbsp;The Handbook of Safeguarding Global Financial Stability examines our political economy, particularly the ways in which these forces inhabit

our institutions, strategies, and tactics. As economies expand and contract, these forces also determine the ways we supervise and regulate. This high-level examination of the global political economy includes articles about specific countries, crises, and international systems as well as broad articles about major concepts and trends. Substantial articles by top scholars set this volume apart from other information sources. Diverse international perspectives result in new opportunities for analysis and research. Rapidly developing subjects will interest readers well into the future.

"The Handbook of Safeguarding Global Financial Stability provides an essential resource for an integrated perspective on financial stability, incorporating advanced analysis that surpasses immediate reactions to the Global Financial Crisis. The views of key policymakers and accomplished scholars are brought together to illuminate financial stability from the perspective of the political economy, economic models, and regulatory functions." --Heidi Mandanis Schooner, The Catholic University of America "This book combines high academic expertise and practitioners' insights into the Global Financial Crisis. It is the kind of the book welcomed by academicians, practitioners, and policy makers who want to understand not only the complexity of this Crisis but financial crises in general." --Roman Matousek, London Metropolitan Business School
