From Asian Development Bank : Inaugural Asia-Pacific Dialogue on Clean Energy Governance, Policy, and Regulation before purchasing it in order to gage whether or not it would be worth my time, and all praised Inaugural Asia-Pacific Dialogue on Clean Energy Governance, Policy, and Regulation:

In response to the growing demand of energy policy makers and regulators in the Asia and Pacific region for additional knowledge support on clean energy, this publication—prepared under the Law and Policy Reform Program of the Office of the General Counsel—presents lessons learned from countries’ clean energy policy and regulatory measures and approaches discussed during the Inaugural Asia-Pacific Dialogue on Clean Energy Governance, Policy, and Regulation held on 21–22 June 2010 at the Asian Development Bank. This publication also seeks to serve as a reference for stakeholders interested in developing a clean energy action plan for Asia and the Pacific.
