**From Cambridge University Press : Indigenous Peoples, Poverty, and Development** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Indigenous Peoples, Poverty, and Development:

0 of 0 people found the following review helpful. Best Source for Data About Indigenous Peoples By Maxine As a person who works on indigenous peoples issues, there is no other source that is as up to date and as comprehensive. A real and tangible lack of data about indigenous communities makes this book a must for anyone working in the indigenous world. 0 of 0 people found the following review helpful. Comprehensive By Ta Chun Hsu I do like these useful analysis which open my eyes to perceive the difficulties that indigenous people encounter. Their insights are great helps to my research.

This book documents poverty systematically for the world's indigenous peoples in developing regions in Asia, Africa and Latin America. The volume compiles results for roughly 85 percent of the world's indigenous peoples. It draws on nationally representative data to compare trends in countries' poverty rates and other social indicators with those for indigenous sub-populations and provides comparable data for a wide range of countries all over the world. It estimates global poverty numbers and analyzes other important development indicators, such as schooling, health and social protection. Provocatively, the results show a marked difference in results across regions, with rapid poverty reduction among indigenous (and non-indigenous) populations in Asia contrasting with relative stagnation - and in some cases falling back - in Latin America and Africa.

'Puts passion aside and meticulously reviews the evidence from both developed and developing countries. The results are eye-opening.' Huffington Post (online) About the Author Gillette H. Hall is Visiting Associate Professor at the Georgetown University Public Policy Institute in Washington, DC. A development economist on leave from the World Bank, she has published journal articles and papers on poverty and development in Latin America, and is co-editor, with Harry Anthony Patrinos, of the book, *Indigenous Peoples, Poverty and Human Development in Latin America* (2006). At Georgetown, Dr Hall teaches a range of applied graduate courses and received the Leslie Whittington Outstanding Faculty Award in 2010. At the World Bank, in addition to research she has worked widely with governments across Latin America on poverty analysis and social protection policy reform. She holds a PhD in Economics from the University of Cambridge, UK. She has also taught at The Johns Hopkins School of Advanced International Studies (SAIS) and the University of Oregon. Harry Anthony Patrinos is Lead Education Economist at the World Bank. He specializes in all areas of education, including labor market outcomes, quality of education, school-based management, demand-side financing and public-private partnerships. He has published more than 40 journal articles and co-authored or co-edited several books, including: *Making Schools Work* (2011), *The Role and Impact of Public-Private Partnerships in Education* (2009), *Indigenous Peoples, Poverty and Human Development in Latin America* (with Gillette H. Hall, 2006), *Policy Analysis of Child Labor: A Comparative Study* (1999), *Decentralization of Education: Demand Side Financing* (1997) and *Indigenous People and Poverty in Latin America: An Empirical Analysis* (1994). Dr Patrinos previously worked as an economist at the Economic Council of Canada. He holds a PhD from the University of Sussex.
