From Routledge : **The Age of Learning: Education and the Knowledge Society** before purchasing it in order to gauge whether or not it would be worth my time, and all praised *The Age of Learning: Education and the Knowledge Society*:

A multidisciplinary analysis of learning in contemporary society. It analyzes both the meaning and the place of these strands that make up modern education and offers an overview of the part they play in the work of all educators,

trainers, teachers and course developers.

"consists of 18 highly informative articles about education and the knowledge society. The book includes five parts...Each theme is well developed within a historical and cultural perspective that enhances understanding of the implications. Most of the information contained in this work relates to the UK but has universal appeal. A major strength of the research is that it gives perspective to the various terminologies used to explain the knowledge and learning concepts that relate especially to lifelong learning. Recommended at all levels." -- CHOICE
About the Author Peter Jarvis is Professor of Continuing Education at the University of Surrey, UK. He heads the Centre for Research in Lifelong Learning at Surrey, in the Department of Education Studies, where all of the other authors are based.
