Food for thought - but all a bit obvious

By Garry Evans Teaching conversation sounds a little like teaching breathing. We all know how to do it. But, like breathing, sometimes it is worth concentrating on exactly how we do it and how we can improve our form. Judy App's book is mostly rather obvious - start with low-key topics, find common ground, listen hard, mirror body language - but there are things here to learn. For example, how to disagree (counteract the disagreement by matching your counterpart's tone, energy and body language). There are also some useful exercises: watch two people speaking and see how they play status games; listen carefully for how someone uses certain words ("I feel...", or "Yes, but..."). Ultimately, this is not a subject that is easy to write about in a non-cliched way. Apps throw in some nice quotes and stories, and has some useful check lists. But, like learning how to breath properly while meditating, even this only makes you think more consciously about how you communicate, it is probably worth a quick read. But it won't turn a taciturn bore into a sparkling conversationalist.
