Bradley J. Sugars : The Business Coach (Instant Success Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Business Coach (Instant Success Series):

If you have little or no formal business education and/or experience, and find yourself running a business, you will almost certainly get value from this book. It can even help you to achieve success. Unfortunately, most of the text is self-promotional waffle, dressed up as fiction. The reader is forced to wade through verbosity to be rewarded with a few key one-liners and the odd paragraph of wisdom. Nothing ground-breaking, mind you, just good back to basics common business sense. This doesn't stop the author for example claiming ownership of an established term like Unique Selling Proposition, which has been around for a long time ("USP as I like to call it"). Other reviewers have covered the next concern in detail, so I'll just echo extreme disappointment in the way associates of the author have created raving reviews for this book. Just google some of the 5 star reviewers to see their association with Sugars and

Action International. I'm returning my copy for a refund, though I don't doubt that the book could be useful in the right hands. 0 of 0 people found the following review helpful.
