Gwen Moran, Sue Johnson : The Complete Idiot's Guide to Business Plans, 2nd Edition before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Complete Idiot's Guide to Business Plans, 2nd Edition:

1 of 1 people found the following review helpful. A must for a new entrepreneur or consultant or copywriter who plans to help with business plans By Brian Crook Often, a copywriter is approached to "write a business plan". "Writing" is but a small part of preparing a business plan. This book will guide the entrepreneur, consultant or copywriter through the research and planning work that makes it a plan. The book complements the "Dummies" equivalent. Buy them both. 2 of 2 people found the following review helpful. This book is helpful By Freeman Writing a business plan sucks and there's no way of getting around that unless you pay to have a plan written for you. This book is helpful. 4 of 5 people found the following review helpful. A powerful pick for any beginning business reader By Midwest Book Review The second updated Complete Idiot's Guide to Business Plans provides a winning writing course designed to help put together a plan to help any business succeed. From how such plans are used to obtain start-up capital to analyzing a market and understanding business writing, this is a powerful pick for any beginning business reader.

It's just good business. 'The Complete Idiot's Guide to Business Plans, Second Edition', helps new and existing entrepreneurs create clear, comprehensive, and compelling business plans by walking them through all of the decisions they'll need to make before writing their plans, and then helping them structure and execute their plans to achieve their specific business goals. According to the Small Business Administration, in 2002 approximately 570,000 new small businesses opened their doors for business, and in 2007, the number rose to 680,000. Data shows that the past three recessions all resulted in significant rises in the number of new small businesses. More than 75 percent of small firms use some form of credit in their start-up or operations.
