Sergio de Cesare, Mark Geoffrey Lycett, Robert Macredie : The Development of Component-based Information Systems (Advances in Management Information Systems) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Development of Component-based Information Systems (Advances in Management Information Systems):

This work provides a comprehensive overview of research and practical issues relating to component-based development information systems (CBIS). Spanning the organizational, developmental, and technical aspects of the subject, the original research included here provides fresh insights into successful CBIS technology and application. Part I covers component-based development methodologies and system architectures. Part II analyzes different aspects of managing component-based development. Part III investigates component-based development versus commercial off-the-shelf products (COTS), including the selection and trading of COTS products.
