From Columbia University Press : The Economists' Voice 2.0: The Financial Crisis, Health Care Reform, and More before purchasing it in order to gage whether or not it would be worth my time, and all praised The Economists' Voice 2.0: The Financial Crisis, Health Care Reform, and More:

The Economists' Voice: Top Economists Take On Today's Problems featured a core collection of

accessible, timely essays on the challenges facing today's global markets and financial institutions. The *Economist's Voice 2.0: The Financial Crisis, Health Care Reform, and More* is the next installment in this popular series, gathering together the strongest essays published in *The Economist's Voice*, a nonpartisan online journal, so that students and general readers can gain a deeper understanding of the financial developments shaping their world. This collection contains thirty-two essays written by academics, economists, presidential advisors, legal specialists, researchers, consultants, and policy makers. They tackle the plain economics and architecture of health care reform, its implications for society and the future of the health insurance industry, and the value of the health insurance subsidies and exchanges built into the law. They consider the effects of financial regulatory reform, the possibilities for ratings reform, and the issue of limiting bankers' pay. An objective examination of the financial crisis and bank bailouts results in two indispensable essays on investment banking regulation after Bear Stearns and the positives and negatives of the Paulson/Bernanke bailout. Contributors weigh the merits of future rescues and suggest alternative strategies for addressing the next financial crisis. A final section examines a unique array of topics: the stability of pension security bonds; the value of a carbon tax, especially in fostering economic and environmental sustainability; the counterintuitive perils of net neutrality; the unforeseen consequences of government debt; the meaning of the Google book search settlement; and the unexploited possibilities for profit in NFL overtime games.
