George Beahm found a way to get my money by dangling interesting bait.1 of 1 people found the following review helpful. It's only their public quotations - - - don't expect too muchBy

John R. Hampton I knew it was only their own words but I had hoped it might reveal a bit more about them and Google. It was OK but nothing really very earthshattering. 2 of 2 people found the following review helpful. Unless you would like to read quotes from Sergey Brin and Larry Page ...By connor Unless you would like to read quotes from Sergey Brin and Larry Page don't get it. Some of the quotes were good, but most of them were unnecessary to read and didn't really talk about business. This is a very quick read, maybe an hour from start to finish. Don't spend your money on this book, it's not worth it.

If you want to find something on the World Wide Web, you Google it. With its 1 million servers located around the world, the company handles over a billion search requests daily. But when the Internet first came online, people struggled to organize a seemingly infinite amount of information. Enter two computer science graduate students from Stanford, Larry Page and Sergey Brin, and the \$229 billion behemoth we now know as Google was born. For the first time, the most thought-provoking, revealing, and inspiring quotes from Google's founders have been compiled into a single book. *The Google Boys: Sergey Brin and Larry Page In Their Own Words* is a comprehensive guidebook to the inner workings of Google's founders. Hundreds of their best quotes, comprising thoughts on business, management, entrepreneurship, technology, innovation, and life lessons, provide an intimate and direct look into the minds of these modern business icons. They are now highly respected, established figures in the tech industry, but Page and Brin, unlike industry icons like Steve Jobs or Bill Gates, have spent as little time as possible in front of the media. As a result, when Larry Page and Sergey Brin give time to speak, people listen. Carefully.

Praise for previous titles in Agate B2's In Their Own Words Series: "It's the same treatment given such luminaries as Winston Churchill, Abraham Lincoln and Christopher Hitchens and offers Jobs's views on life, death, technology and design, among other topics." Timothy R. Smith, *The Washington Post* "[It's] like eating salted peanuts: Once you start reading, it's hard to stop." Anne Fisher, *CNN Money*
