Gijs van Wulfen : The Innovation Expedition: A Visual Toolkit to Start Innovation before purchasing it in order to gauge whether or not it would be worth my time, and all praised *The Innovation Expedition: A Visual Toolkit to Start Innovation*:

4 of 4 people found the following review helpful. An Academic Approach to Innovation BuildingBy Hugh SutherlandThe author takes too long to make his point and uses early expedition analogies, which are mostly abstract achievements, in comparison with modern boardroom challenges. The examples of how-to go about innovation are cluttered with a textbook approach, set mostly in a listed company \$ billion environment, which I believe is way beyond the small enterprise entrepreneur who would be looking to find ideas in this book.2 of 2 people found the following review helpful. Must buyBy Joann MacMasterI read dozens of business books each year and this was a genuine surprise. It's a quick and fun read with case studies based on interesting stories that anyone can identify with. Don't go through it too quickly, however, because each case study presents a series of unique ideas that you can translate directly to your research, business, or whatever the task may be. It challenges you to change the way you (and your team) think. It's been very helpful in my work. At the very least it's a great book with incredible (true) stories. Highly recommend!1 of 1 people found the following review helpful. InnovateBy Per-Anders HedinInspirational and full of facts. Perfect to use as a starting point for discussion with potential clients.

Innovation is highly relevant to every organization. Yet, eighty percent of innovation projects never reach the market. Many have a false start. *The Innovation Expedition* is written to inspire you with practical tools on HOW to start innovation effectively. It gives you practical and visual tools. The remarkable stories of how great explorers overcame unexpected setbacks will inspire you. How Columbus discovered America, how Hillary reached the summit of Everest and how Neil Armstrong got to be the first man on the Moon. With 240 pages full of exploration stories, quotes, charts, cases, checklists, formats and innovation maps, *The Innovation Expedition* is an inspiring visual

toolkit to start innovation successfully. It's written for innovators: managers, consultants, entrepreneurs and organization leaders.

From the Author Innovation is highly relevant to every organization. Yet, eighty percent of innovation projects never reach the market. Many have a false start. The Innovation Expedition is written to inspire you with practical tools on HOW to start innovation effectively. This book is intended for innovators: managers, consultants, entrepreneurs and organization leaders. The process of innovation is highly relevant in their professional capacity; and it is a process that many struggle to master. "What is the right moment?" "How do I discover what customers want?" "How do I get breakthrough ideas?" "How do I get internal support?" This book takes an original approach to show how you can innovate the expedition way! It draws parallels between mankind's greatest explorations in history and modern-day innovation. How Columbus discovered America; how Hillary reached the summit of Everest; and how Neil Armstrong got to be the first man on the Moon. Their remarkable stories of exploration and how they overcame unexpected setbacks will inspire you to approach innovation with a new mindset. The Innovation Expedition is a visual toolkit for a successful start to innovation. It is 240 pages packed with accounts of historic explorations, quotes, charts, cases, checklists, formats and innovation maps. The fundamental parallels that can be drawn between historic voyages of discovery and innovation today are that: the process takes time; it's full of risks; and there will be unexpected setbacks. The book is full of practical and visual tools. And with its unusual design, The Innovation Expedition is a unique, hands-on voyage of discovery in itself. One important lesson that you should take from this toolkit is: "You cannot innovate alone." Likewise, The Innovation Expedition could not be written alone and without support at each stage of development. First of all, I'd like to thank all the users, facilitators and fans of the FORTH innovation method. Their on-going support and practical feedback are what make FORTH a dynamic innovation expedition, which continues to innovate itself year after year. Next, there are a few people I'd like to thank specifically: Christine Boekholt for her excellent advice on textual content, designer Frederik de Wal for co-creating this book in a wonderful style and publisher Rudolf van Wezel for his support making The Innovation Expedition a reality. Finally, I am grateful for the internal support of my loving family. This undertaking could not have been accomplished without their boundless patience and encouragement.

From the Back Cover Innovation is highly relevant to every organization. Yet, eighty percent of innovation projects never reach the market. Many have a false start. The Innovation Expedition is written to inspire you with practical tools on HOW to start innovation effectively. It gives you practical and visual tools. The remarkable stories of how great explorers overcame unexpected setbacks will inspire you. How Columbus discovered America, how Hillary reached the summit of Everest and how Neil Armstrong got to be the first man on the Moon. With 240 pages full of exploration stories, quotes, charts, cases, checklists, formats and innovation maps, 'The Innovation Expedition' is an inspiring visual toolkit to start innovation successfully. It's written for innovators: managers, consultants, entrepreneurs and organization leaders. Innovate the expedition way! About the Author Gijs van Wulfen is an international acclaimed innovation specialist, author, speaker and blogger. He is founder and facilitator of the FORTH innovation method: a structured effective way to ideate new products, services and business models. (forth-innovation.com).
